For Complete List of Papers Visit our website <https://fcpsworld.com/fcps-pastpapers>

- Aplastic anemia can be associated with:----->radiation
- At birth ossification center in epiphysis of bone called:----->distal end of femur
- Atypical lymphocytes. A heterophil test for sheep antigen is negative. Virus is: ----->cytomegalovirus
- Autoregulation of the kidney blood flow is done by ----->tuboglomerular feedback mechanism
- B.p. 60/40 mm hg. The response most potent is:----->cns ischemic response
- Both alpha and beta stimulator----->epinephrine
- Bronchogenic carcinoma is caused by----->hvp
- Cervical carcinoma, cis cin is due to----->hvp
- Characteristic for dx of asthma is:----->fev1
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Clara cells present are present ----->terminal bronchioles
- Clomiphene citrate causes the ovulation by:----->by acting on hypothalamus
- Comparison of mean bsl levels of group females and group of males, test is----->t-test
- Complete mole:----->diploidy
- Core temperature during the long surgery probe measured from the:----->tympanic
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Cross bridges in the skeletal muscle are formed by:----->myosin
- Cutaneous porphyria, the enzyme deficient is:----->uroporphyrinogen decarboxylase
- Decreases height of action potential is:----->hyponatremia
- Deficiency of vitamin a ----->keratomalacia
- Dehydration of child by palpating head till the age----->24 months
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Diminished the ankle jerk. Nerve involve----->s1 root
- Directly stimulates thirst center in hypothalamas is:----->angiotensin 2
- Doc for diabetic gastroparesis----->metoclopramide
- Dormant state of the malarial parasite is:----->hypnozoite
- During pregnancy decreases:----->pco2
- During staging, laparotomy of ovarian ca ovarian artery is ligated near the pelvic brim the structure which is damaged is:----->ureter
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Early diastolic murmur with low preload, left ventricular hypertrophy and pulmonary oedema features are seen in the:----->aortic regurgitation
- Edema after the burn is due to:----->albumin
- Enlarged clitoris diagnosis is:----->androgenital syndrome
- Extracellular osmolarity is controlled by ----->aldosterone
- Femoral and obturator nerve originate from ----->l2-l4
- Food poisoning, stool culture shows gram negative organism----->e-coli
- Germinal follicles present in the:----->cortex of lymph node

- Glomerular crescent is formed by the:----->parietal cell +macrophages
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Haploid chromatin, haploid dna can be seen in:-----> both a and b
- Heme binds with:----->hemopexin
- Hormone acts on smooth muscles and causes its constriction is----->adh
- Hyperphagia and obesity will have lesion----->ventromedial nucleus
- Hyperpolarization is due to:----->efflux of k
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Hypertension is managed intraoperatively-----> iv hydralazine
- Hypophysectomy will primarily effect the cells of:----->principle cells of thyroid
- In hypoxia ----->anaerobic glycolysis forming lactic acid
- In lowering pitch, the muscle used ----->thyroarytenoid
- In pin worm mode of spread is :----->ingestion of eggs
- In pregnancy of less than ten days, test for confirmation of pregnancy is:----->serum bhcg
- In thermoregulation of body the response of posterior hypothalamus is:----->shivering
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Incidence is defined as :----->total number of new cases in a year
- Incision in hysterectomy----->pfannenstiel
- Increasing the stroke volume while keeping tpr and diastolic pressure result in :----->increase map & increase pulse pressure
- Inferior epigastric artery is branch of:----->external iliax
- Intracellular volume in a body of 75 kg adult is :----->28l
- Ischiorectal fossa abscess drainage result in damage :----->inferior rectal nerve
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Knudson's two hit hypothesis is for----->retinoblastoma
- Leptin mechanism of action is:----->enzyme linked
- Lesion of hemiplegia result in----->contralateral loss of pain & temperature below level
- Ligamentum teres is:----->left umbilical vein remnant
- Lipophilic drugs act by ----->mRNA synthesis
- Major pathway of the axillary lymph flow parallel to the lymphatics is:----->axillary vessels to axillary lymph nodes
- Malignant cells repair short of chromosomes by----->telomerase
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Maximum saturation in the fetal vessel----->umbilical vein
- Milk production hormone is:----->oxytocin prolactin
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Most important buffer of blood and plasma is:----->hco₃/h₂co₃

- Newborn developed jaundice on second day of birth, mother has blood group b+, baby is breast fed and normally. Baby's indirect bilirubin is 8 mg/dl and total bilirubin is 10 mg/ dl.the baby is suffering from:----->physiological jaundice
- Obstetric nerve block cause the urinary incontinence, the anaesthetized muscle located in:----->urogenital diaphragm
- Omentum necrosis's is----->fat necrosis
- One gram of lignocaine in two % solution contain:----->100 ml
- Organism forms swarming colonies and high moility the organism is:----->proteus
- Osmolarity of icf or ecf is maintained by ----->na
- Pain in joint and is warm, tender and swollen .----->gout
- Pain in medial side of thigh. Structure damaged is:----->obturator nerve
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Parasympathetic stimulation is associated with:----->git stimulation
- Pectin binds to the:----->enzyme receptor
- Pituitary gland:----->abnormality causes junctional scotoma
- Postganglionic sympathetic fibers release the:----->nor-epinephrine
- Pregnant woman, 21th week of gestation, doc for hyperthyroidism is:----->methimazole
- Primary amenorrhea hymenal opening intact pathology is----->cervical atresia
- Prostate lymphatic drainage:----->internal iliac nodes
- Pt. Time is normal but aptt and bleeding time is prolonged.the effect in:----->intrinsic pathway
- Rise in adrenaline due to sympathetic system stimulation causes :----->inc. Glycogenolysis
- Rt hypoglossal nerve damage will cause----->tongue deviated on rt side with atrophy
- Sacral hiatus is formed by :----->unfused s4 s5
- Safer post op analgesic:----->paractamol
- Sensation of the rectal distention is carried by nerves known as:----->sacral parasympathetic nerves
- Severe vomiting result in----->metabolic alkalosis
- Similar nerve supply as mylohyoid is:----->anterior belly of digastric
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Spinal level of the pelviuretic junction level is:----->l2
- Split s2 is finding upon auscultation of s2 heart sound. The reason is:----->late closure of pulmonary valve
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Stand on his right leg his left hip drops.nerves damaged is:----->right superior gluteal
- Swaying on eyes closed and still sway while open his eyes lesion in present:----->cerebellum
- Systemaic lupus erythematosus hypersensitivity reaction is:----->type 3
- Temperature set point maintained by----->posterior hypothalamus
- **Join fcpsworld online classes and clear exam in 1st attempt (Inshllah)**
- Thalassemia trait ,the characteristic feature is:----->microcytes
